

SUPERSOFT™

The Supersoft™ material is a furniture-type fabric made from 100% polyester in its surface composition, and a 95% polyester/5% spandex mix for its backing composition, which also gives it somewhat of a suede feeling.

It has great ISO-tested tensile strength and tear growth resistance, while still being very breathable and soft to the touch. It is exceptionally pleasing to sit in and at the same time keeps you cool for long-term use.

A very pleasant feature of the fabric is how quiet it is, not producing a rubbing noise like other materials might.

The fabric is easily cleaned and can be washed by following the clean and care instructions. Washing the fabric too frequently can affect performance. The best way to take care of stains or spills is to clean them up right away using a neutral soap solution, applied with a cloth in smooth circular movements. Arozzi's cleaning kit is perfectly suited to handle any stains.
